

More than 45 years family entrepreneur with passion

We mourn the loss of our company founder and long-standing managing partner Dieter Walter, who passed away after a short illness on 23.11.2022.

Dieter Walter founded HEMA Maschinen- und Apparateschutz GmbH in 1977 and has continuously built up and integrated other companies and sales partners over the years. In doing so, he laid the foundation for today's internationally active HEMA Group - an international group of companies with almost 700 employees worldwide.

We will cherish his life's work and the achievements he has made in the more than four decades since the company was founded, and we will remember him with gratitude.

With great respect for his achievements,
but also in silent mourning
